

SmartShell™ Knee Pads

**BKKN100, BKKN200,
BKKN300**
Hard Shell, EVA and Gel Knee Pads

Brass Knuckle® BKKN100, BKKN200 BKKN300

According to the Bureau of Labor Statistics (BLS), musculoskeletal disorders (MSDs)—injuries or disorders of muscles, nerves, tendons, joints, cartilage, or spinal discs—are the most frequently recorded injuries in construction, masonry, and many occupations. Tasks that routinely require kneeling on the job can put an employee at significant risk for MSDs. Personal protective equipment (PPE) such as knee pads help reduce the risk of injury by either reducing impact injury, minimizing joint fatigue, or both.

Ideal Markets

Agriculture | Assembly | Construction | Electrical | Flooring | HVAC | Landscaping | Manufacturing | Mining | Receiving | Welding

TAKE A KNEE. STABILITY. PROTECTION. FLEXIBILITY.

When work brings you to your knees—literally—Brass Knuckle® has you covered. Each of our three solutions provides excellent protection but with varying degrees of flexibility and comfort, allowing you to choose based on the application and desired value.

The **BKKN100** is an ethylene-vinyl acetate (EVA) light-duty cushioned knee pad. A single strap with hook-and-loop closure keeps pad in place for lightweight comfort and protection.

The **BKKN200** is more heavy-duty, more long-wearing protection. The hard polyurethane cap conforms to the shape of the patella, keeping it stable. An abrasion-resistant cap allows for safer pivoting, and foam padding throughout maximizes wearer comfort.

The **BKKN300** is the all-day solution. This pad literally creates a secondary working surface made of soft gel-injected cushioning. The broad cap redirects pressure away from the patella, and weight is dispersed evenly as stability is retained. Slide and glide all day in comfort.

SmartShell™ Knee Pads

**BKKN100, BKKN200,
BKKN300**

Hard Shell, EVA and Gel Knee Pads

BKKN300

1. Gel-injected foam padding to absorb impact.
2. Rugged and flat plastic cap creates a steady footer for long-term kneeling projects.
3. Corner “glides” facilitate sliding and scooting.
4. Broad strap eliminates pressure point; prevents bunching and slipping.
5. Adjustable hook-and-loop closure keeps knee pads where they belong.

Heavy-duty protection with hard contoured cap.

BKKN200

Light-duty protection. Cushioned and adjustable knee pad.

BKKN100

Brass Knuckle® SmartShell™ BKKN300, BKKN200, and BKKN100

Ideal for working while kneeling on the ground or on hard surfaces and for impact protection in every industry. Our complete line ensures excellent all-day protection for cement work, flooring installation, and roof work. Also a more value-based option for occasional impact or more short-term applications.
